Consultancy & Mentoring

If you feel your career in the Music Business is just not happening as fast as you would like or with as much success, you may well benefit from one-to-one mentoring with me.

I've had 20 years experience in every aspect of 'life as a songwriter' and have pretty much been through all the highs and lows, frustrations and celebrations, not to mention wasting time and money travelling down the wrong roads.

If only I'd had someone there in the early days as a guide to honestly tell me whether my song was a hit or a pile of crap! And then explain why...

So what will I do?

Simply put - my mentoring sessions are there to help you get where you want to be more quickly than doing it alone. But you have to really want to get there.

I can give you ongoing help and advice with:

- Writing better songs
- Recording better demos
- Pitching your songs to artists and labels
- Networking yourself in the music business

I'll help you set achievable goals to drive your progress, advise you on which songs are working, where to focus your time and effort and not least of all keep you positive and motivated!

We can meet face to face, talk on the phone or online as often or as little as you like.

You may just want that one session to kick start you again and point you in the right direction.
